## PROFILE

A tinkerer from birth. After a career of building and repairing vehicles, making the sum greater than that of its parts, a career in development has begun. I am thrilled to pivot from a career in automotives to one of software development, bringing with me years of experience solving complex and interconnected issues.

## SKILLS

HTML / CSS, Javascript / React, SQL

C# / .NET, Git/GitHub

## EXPERIENCE

### SOFTWARE DEVELOPER

Certificate Program - Nashville Software School

2022-2023

Intensive full-time software development bootcamp focusing on full stack development fundamentals and problem solving. The final half of the program executed in a simulated company environment with Scrum methodology.

- Hands on application of OOP fundamentals through group and individual projects reflecting real world business problems
- Source code version control and project management with Git/GitHub
- JavaScript fundamentals leveraging DRY, modular, readable code and reusable components
- Built browser-based single page applications using React, HTML, and CSS
- Styled applications with CSS Frameworks, Bootstrap and Materialize, and wrote custom styles as needed
- Application design through white boarding dependencies and building ERD's
- Created and modified database design/content using SQL, ADO.NET, and ORM tooling, including exposure and experience with migrations
- Created RESTful APIs with C#/.NET using WebAPI

## APPS

### ITS TRICKY

A dog lover's dream, It's Tricky is a website dedicated to discovering and teaching your dog tricks. With a user created database of dog tricks, and tracking per pet, It's Tricky is a hub for man, and his best friend.

**Built using React, HTML, CSS and SemanticUI, and a backend of JSON.**

### OK, GROOMER!

"OK, Groomer!" is a pet spa that needed a webpage for its customers to book grooming appointments, and for their groomers to track their workload.

**A React front end complimented by a back end of C# and a database in SQL.**

## VOLKSWAGEN

- Diagnostic Technician
- Documentation - Highly detailed notes and documentation were required to meet VW warranty claims. Documenting down to the individual bolts replaced was required.
- Networking - Extensively used Volkswagen ODIS software to properly interface with hundreds of on board computers and the network connecting them.

## MAZDA

- Diagnostic Technician
- User Experience - Condensed the most important information into a short video inspection for the vehicle owner.
- Extensively used Mazda IDS software to properly interface with multiple on board computers

## FIRESTONE

- Diagnostic Technician / Shop Foreman
- Made use of many different software applications to manage customer records, inventory numbers for both my own store and third party vendors, and repair orders of vehicles in our care
- Worked alongside both a service manager, and a sales manager, to get quick, accurate quotes, and time frames, for a given repair for all technicians in the shop
- Made decisions on dispatching repair orders to technicians to get the accurate repairs done in the most timely manner
